

# TOP 6 TIPS FOR CRUISING

what you should pack and do once you board the ship

1

## WHEN YOU EMBARK

If you weren't able or allowed to make reservations for dining, shows or onboard activities prior to boarding, be sure to make those reservations once you board either via the cruise line's app or at the designated spot onboard.

2

## GET FAMILIAR WITH THE SHIP

After you made your reservations, try getting a bite to eat and/or go for a self guided tour of the ship to familiarize yourself with the layout. It's best to start from the top deck and work yourself down

3

## MAGNETS

The doors and walls of the cabins are often magnetic. A great way to decorate or identify your cabin is by placing fun magnetic decorations on your door. You can also use a dry erase board to leave messages or games. Magnetic hooks can be used inside the cabin for extra storage. Check with cruise lines to be sure the use of these magnets are allowed.

4

## SEA SICKNESS

If you should get that sea sickness feeling, try wearing sea bands while cruising. Also when you get that queasy feeling, eating a green apple or ginger candies can help you feel better.

5

## CHARGE ME UP

With so many devices to charge and not enough outlets, a strip outlet is not allowed to bring onboard. Try bringing a USB hub to charge more than one device.

6

## BRING YOUR OWN GEAR

If going to a beach is part of your planned itinerary, bring your own snorkel mask and tube (to blow up there) rather than renting it at the destination. It's cheaper and more sanitary.
